“The Cloud Application Engine allows users to create applications once and deploy to clouds around the world for a broad range of devices”

Mr Tan Choon Ngee, Regional Director, aZaaS Pte Ltd

Cloud Application Engine

The Cloud Application Engine is the flagship product of aZaaS Pte Ltd. It features an application designer built on Windows Presentation Foundation and a cloud workspace built on Silverlight. Users can create applications in a matter of minutes using the application designer and deploy to multiple clouds for many devices. With multi-touch, vector graphic and optimized data streaming, sleek applications created on the Cloud Application Engine have exceptional user-experience.

Broad Range of Solutions

Use the Cloud Application Engine to create applications for customers and employees. It has been used for Human Resource Management, Trading System, Sales Order Management, Travel Request, Photo Album Portal and others.

Benefits

- Multi-Touch User-Friendly Interface
- Short Implementation Period
- Create Once, Deploy to Many Devices
- Focus on Business Value
